

# 8-3

## MAIN ROTOR BLADE ATTACHMENT (BLADES NOT INCLUDED)

Two sets required

	.....2 pcs
<b>Socket Head Bolt, 4 x 35 mm</b>	
	.....2 pcs
<b>Lock Nut, 4 mm</b>	
	.....4 pcs
<b>Main Rotor Blade Spacers, 4 mm (12 mm Grip)</b>	
	.....2 pcs
<b>Socket Head Bolt, 5 x 35 mm</b>	
	.....2 pcs
<b>Lock Nut, 5 mm</b>	

Hold the 4 mm Lock Nut while tightening using a Wiha 7 mm Nut Driver or equivalent.

Firmly secure the main rotor blades to the rotor head as shown above. Be sure to note the proper direction of the rotor blades when assembling (clockwise rotation). Main blades should be tightened so they can pivot when moderate pressure is applied. Do not allow the main blades to swing freely within the main blade holders.

**Note:**

5 mm bolts are placed top down,  
4 mm bolts are inserted bottom up.

Insert the main rotor blade spacers as shown.

Apply a light drop of CA adhesive to hold the main rotor blade spacers in place.

## FINAL PREFLIGHT CHECK

Once all assemblies have been completed, please review the following suggestions before attempting initial flights.

- Review the instruction book and confirm that all assembly steps have been completed thoroughly.
- Check to insure that all servos are operating smoothly and in the correct direction. Also verify that there is no binding in the control rods and that each servo horn is secured with a servo horn mounting screw.
- Check to insure that all bolts and screws have been completely tightened and secured with threadlock where indicated.
- Verify that the gyro is operational and compensating in the correct direction (detailed in Section 7, page 61).
- Make sure that both the transmitter and receiver have been fully charged (refer to your radio system instructions for proper charging procedures).
- Check to insure that the throttle is working properly and in the correct direction.

## BLADE TRACKING ADJUSTMENT

Blade “tracking” is an adjustment to the main rotor blade pitch that must be accomplished during the initial test flights.

Although the blade pitch angle in each blade may appear equal, it is still possible for a set of main rotor blades to run “out of track,” making adjustment necessary.

Main rotor blades that are out of track with one another can cause vibration, instability, and a loss of power due to additional drag.

On the initial flight, it will be necessary to increase the blade speed to just before

lift-off rpm and view the rotor disc at eye level from a safe distance (approximately 15 to 20 feet).

Note which blade is running low (by colored tracking tape) and increase the pitch of the low blade one turn of the ball link at a time until each blade runs in track (on the same plane).

Please refer to the diagrams below to identify the different tracking situations, as well as several methods to mark each rotor blade for tracking identification.

## BLADE TRACKING IDENTIFICATION

**Caution:** Be sure to maintain a safe distance from the helicopter (15 to 20 feet) when tracking main rotor blades.

### Blade Labeling for Tracking Purposes

- A: Use two different blade tracking tape colors (e.g., black and red) at the tip of each main rotor blade.
- B: Use the same color blade tracking tape located at different positions on each rotor blade.

**Note:** Adding additional blade tracking tape to the rotor blades at this stage will make it necessary to re-static balance the main rotor blades.

### Engine

After each day of flying, fully drain the fuel tank. Then start the engine and let it idle until the engine and the fuel line are completely burned off. It is also suggested that an after-run oil be used to prevent premature engine corrosion.

### Check All Nuts and Bolts

A helicopter is subject to high vibration during flight. It is important to check that all screws, nuts and bolts are properly secured after each day of flying. It is also suggested that you perform a “quick” inspection between each initial test flight for approximately the first 6 to 10 flights.

### Main Rotor Head

It will be necessary for the main rotor head dampers to be checked/and or replaced every 30–50 flights to maintain maximum rotor head performance. When replacing the main rotor head dampers, apply a light coating of oil to the dampers to prolong life.

It is also suggested at this time that the rotor head thrust bearings be lubricated using a high speed grease. This will prolong the visibility of the thrust bearings.

### Tail Gear Case

The tail gear case should be repacked with grease every 50 or so flights. the tail pitch slider and mechanism should be oiled lightly every 5–10 flights to help reduce wear.

### Washout Base

Lubricate the washout base using light oil every 10–15 flights to insure smooth operating and reduce wear. Inspect the washout base every 50–75 flights. If excess wear is noted, replace as needed.

### Tail Pitch Slider

Lubricate the tail pitch slider using light oil every 5–10 flights to insure smooth operation and reduce wear.

### Check Ball Link Wear

Check to insure that all universal links fit freely but securely to the control balls. If there is excessive play noted, adjust and or replace the universal link in question.

### Battery Maintenance

Check to insure that your batteries are properly mounted and charged. The most frequent cause of crashes (aside from pilot error) is battery failure or disconnection. Be certain that your batteries are fully charged and limit your flight time to 3 or 4 flights between charging. If more flight time is required, purchase a reliable quick field charger.

### Cleaning

At the end of each flight or flying session, wipe down your helicopter with a clean towel or rag. This is also a good time to inspect all parts for tightness or fatigue. Remember, a clean, well-maintained helicopter will provide you with many hours of trouble-free flight.

### Ball Links

Check ball links every 15–20 flights for increased play and looseness. Adjust the ball links using pliers to tighten the ball race if needed.

# P-1

## ASSEMBLY PROCESS – MAIN ROTOR HEAD 1

Use caution when inserting the main blade holder bearings so as not to distort/damage the main blade holders.  
Make two main blade holders.

**TEAM TIP:** JB Weld the bearings into the blade holders to reduce play in the blade holders.

# P-2

## ASSEMBLY PROCESS – MAIN ROTOR HEAD 2

Use Red Threadlock

# P-3

## ASSEMBLY PROCESS PARTS – MAIN ROTOR HEAD 3

-  .....2 pcs  
Button Head Bolt, 3 x 5 mm
-  .....2 pcs  
Seesaw Spacer Collar

\* Be sure to note correct placement of the front and the back of the seesaw assembly.

# P-4

## ASSEMBLY PROCESS – MAIN ROTOR HEAD 4

-  .....2 pcs  
Socket Head Bolt, 3 x 15 mm
-  .....4 pcs  
Flat Head Screw, 2 x 8 mm
-  .....4 pcs  
Steel Joint Ball
-  .....2 pcs  
Washer, 3 x 4.5 x 0.7 mm  
(Thickness 0.7 mm)
-  .....2 pcs  
Washer, 3 x 4.5 x 0.4 mm  
(Thickness 0.4 mm)
-  .....4 pcs  
Hex Nut, 2 mm

Use Red Threadlock

# P-5

## ASSEMBLY PROCESS – WASHOUT UNIT

	.....2 pcs
<b>Socket Head Bolt, 3 x 15 mm</b>	
	.....2 pcs
<b>Flat Head Screw, 2 x 10 mm</b>	
	.....4 pcs
<b>Flange Bearing, 3 x 8 x 4 mm</b>	
	.....2 pcs
<b>Washout Link Pin</b>	
	.....4 pcs
<b>CA Stopper Ring, 2 mm</b>	
	.....2 pcs
<b>Washer, 3 x 4.5 x 0.4 mm</b>	
	.....2 pcs
<b>Spacer, 3 x 5 x 1.8 mm</b>	
	.....2 pcs
<b>Steel Joint Ball</b>	

# P-6

## ASSEMBLY PROCESS – TAIL SLIDE RING

	.....2 pcs
<b>Tail Pitch Link Pin</b>	

-  .....2 pcs  
**Flat Head Screw, 2 x 8 mm**
-  .....2 pcs  
**Steel Joint Ball**

**Make two flybar control arms.**

**Use Red Threadlock**

# START SHAFT/ CLUTCH/ ENGINE ASSEMBLY

**VIBE 90 3D MANUAL PARTS LISTINGS**  
**Start Shaft/ Clutch/ Engine Assembly**

<b>Part #</b>	<b>Description</b>	<b>Quantity</b>	<b>Comments/ Additional Contents</b>
996101	Hex Shaft Adaptor	1	Complete w/ 4 x 4 mm set screw
980004	Set Screw, 4 x 4 mm	10	
981025	Bearing, Sealed, 5 x 19 x 6 mm	2	
996091	Start Shaft Bearing Block w/BB	1	
980036	Flat Washer, 3 mm	10	
980013	Socket Head Bolt, 3 x 8 mm	10	
996089	Clutch Bell Assembly w/BB	1	Complete w/bearing & clutch lining
970080	Clutch lining	1	
996100	Start Shaft	1	
996092	Clutch Assembly	1	Complete w/two 4 x 6 mm bolts
980062	Socket Head Bolt, 4 x 6 mm	10	
981005	Ball Bearing, 10 x 19 x 7 mm	2	
996090	Pinion Gear, 11 Tooth	1	
991001	Ball Bearing, 15 x 24 x 5 mm	1	
996080	Long Bearing Block "B"	1	Complete w/bearing
996016	Long Bearing Block "A"	1	Complete w/bearing
980059	Socket Head Bolt, 3 x 14 mm	10	
970050	Taper Collet "B", Upper	1	
996006	Cooling Fan Shroud	1	1-left, 1-right half complete w/screws
996002	Cooling Shroud Brackets	2	Complete w/screws and washers
996003	Cooling Fan Blades	1	Complete w/screws and washers
996011	Cooling Fan Hub	1	
980062	Socket Head Bolt, 4 x 6 mm	10	
970001	Steel Joint Ball w/2 x 8 mm Screw	10	Complete w/ten 2 x 8 mm screws
980037	Hex Nut, 2 mm	10	
970004	Universal Ball Link	10	
996075	Engine Mount	1	
970102	Taper Collet "C", Lower	1	

# MAIN FRAME/LANDING GEAR/AUTOROTATION ASSEMBLY

**VIBE 90 3D MANUAL PARTS LISTINGS**  
**Main Frame/Landing Gear/Autorotation Assembly**

<b>Part #</b>	<b>Description</b>	<b>Quantity</b>	<b>Comments/ Additional Contents</b>
980039	Nylon Lock Nut, 3 mm Low Profile	10	
996009	Upper Main Shaft Bearing Block w/BB	1	Complete with ball bearing
996082	Tail Boom Mounting Clamp, 2-piece	1	
994009	Tail Boom Mounting Clamp, 1-piece	1	
996004	I-Beam Cross member "B"	2	
9960191	Main Frame Set	1	Complete Set (2 pcs)
980022	Socket Head Bolt, 3 x 40 mm	10	
996001	I-Beam Cross member "A"	1	
970020	Main Frame Cross member, 32 mm	2	
980061	Socket Head Bolt, 3 x 25 mm	10	
980014	Socket Head Bolt, 3 x 10 mm	10	
990053	Socket Head Bolt, 3.5 x 6 mm	10	
970018	Mixing Lever Spacer	2	
980036	Flat Washer, 3 mm	10	
980019	Socket Head Bolt, 3 x 22 mm	10	
980122	Socket Head Bolt, 3 x 50 mm	10	
980013	Socket Head Bolt, 3 x 8 mm	10	
960097	Main Frame Cross member, 48 mm	2	
9960081	Fuel Tank Mounting Frames	2	
970204	Canopy Mounting Standoff	2	
99601911	Front Radio Bed	1	
980004	Set Screw, 4 x 4 mm	10	
970008	Main Shaft Collar	1	Complete w/four 4 x 4 mm set screws
996065	Main Rotor Shaft, Hardened	1	
996005	Landing Strut Mounts	4	
980014	Socket Head Bolt, 3 x 10 mm	10	
992018	Carbon Bottom Frame Plate	1	
996081	Rear Grounding Bracket	1	
980012	Socket Head Bolt, 3 x 6 mm	10	
960338	Landing Struts, White	2	
980004	Set Screw, 4 x 4 mm	10	
980060	Socket Head Bolt, 3 x 20 mm	10	
960036	Antenna Tube	3	
960119	Landing Skids	2	Complete w/four skid caps
970048	Landing Skid Caps	4	
996015	Autorotation Assembly	1	
960002	88T Molded Main Drive Gear	1	(standard)
970047	Main Shaft Washer and Bolt	1	Complete w/one 6 x 10 mm hex bolt
994001	Steel Auto Hub Washer	1	

# SWASHPLATE/CCPM CONTROL SYSTEM

**VIBE 90 3D MANUAL PARTS LISTINGS**

## VIBE 90 3D WARRANTY INFORMATION

Horizon Hobby, Inc. guarantees this kit to be free from defects in both material and workmanship at the date of purchase. This warranty does not cover any parts damaged by use or modification. In no case shall Horizon Hobby's liability exceed the original cost of the purchased kit. Further, Horizon Hobby reserves the right to change or modify this warranty without notice.

This warranty covers only those products purchased from an authorized Horizon Hobby dealer. Third party transactions are not covered by this warranty. Proof of purchase is required for warranty claims. Horizon Hobby, Inc. reserves the right to inspect any and all equipment involved in a warranty claim. Repair or replacement decisions are at the sole discretion of Horizon Hobby, Inc. Collateral damage of any type is not covered under this warranty.

In that Horizon Hobby has no control over the final assembly or material used for the final assembly, no liability shall be assumed nor accepted for any damage of or caused by the final user-assembled product. By the act of using the product, the user accepts all resulting liability.

Once assembly of the model has been started, you must contact Horizon Hobby, Inc. directly regarding any warranty question that you have. Please do not contact your local hobby store regarding warranty issues, even if that is where you purchased it. This will enable Horizon to better answer your questions and provide service in the event that you may need any assistance.

If the buyer or user is not prepared to accept the liability associated with the use of this product, they are advised to return this kit immediately in new and unused condition to the place of purchase.
