12-INCH POOL RACER RTR

Owners Manual • Bedienungsanleitung
Manuel de l’utilisateur • Manuale dell’utente
When handling and/or transporting your boat, always keep a safe distance in all directions around your boat. Always operate your model in open spaces away from full-size vehicles, traffic and people. Always avoid water exposure to all equipment not electrical out of the reach of children. Always avoid water exposure to all equipment not specifically designed and protected for this purpose. Moisture causes damage to unprotected electronics. Never place any portion of the model in your mouth as it could cause serious injury or even death. Never operate your model with low transmitter batteries.

Safety Precautions and Warnings
As the user of this product, you are solely responsible for operating in a manner that does not endanger yourself and others or result in damage to the product or the property of others.

- When handling and/or transporting your boat, always pick up the boat from the sides, keeping all moving parts pointed away from you.
- Always keep a safe distance in all directions around your model to avoid collisions or injury. This model is controlled by a radio signal subject to interference from many sources outside your control. Interference can cause momentary loss of control.
- Always operate your model in open spaces away from full-size vehicles, traffic and people.
- Always carefully follow the directions and warnings for this and any optional support equipment (chargers, rechargeable battery packs, etc.).
- Always keep all chemicals, small parts and anything electrical out of the reach of children.
- Always avoid water exposure to all equipment not specifically designed and protected for this purpose. Moisture causes damage to unprotected electronics.
- Never place any portion of the model in your mouth as it could cause serious injury or even death.
- Never operate your model with low transmitter batteries.

Your new Horizon Hobby boat has been designed and built with a combination of waterproof and water-resistant components to allow you to operate the product in calm, fresh water conditions.

While the entire boat is highly water-resistant, it is not completely waterproof and your boat should NOT be treated like a submarine. The various electronic components used in the boat, such as the servo(s) and receiver are waterproof, however, most of the mechanical components are water-resistant and require additional maintenance after use.

Metal parts, including the bearings, pins, screws and nuts, propeller, rudder, rudder mounts, prop struts, as well as the contacts in the electrical cables, will be susceptible to corrosion if additional maintenance is not performed after running in wet conditions. To maximize the long-term performance of your boat and to keep the warranty intact, the procedures described in the “Wet Conditions Maintenance” section must be performed regularly.

**CAUTION:** Failure to exercise caution while using this product and complying with the following precautions could result in product malfunction and/or void the warranty.

### General Precautions
- Read the **WET CONDITIONS MAINTENANCE** procedures and make sure that you have all the tools you will need to properly maintain your boat.
- Not all batteries can be used in wet conditions. Consult the battery manufacturer before use. Caution should be taken when using Li-Po batteries in wet conditions.
- Most transmitters are not water-resistant. Consult your transmitter’s manual or the manufacturer before operation.
- Never operate your transmitter or boat when lightning is present.
- Salt water is very conductive and highly corrosive. If you choose to run your boat in salt water, immediately rinse the boat in fresh water after each use. Operating your boat in salt water is at the sole discretion of the modeler.

### Wet Conditions Maintenance
- Drain any water that has collected in the hull by removing the drain plug or canopy and tilting the boat in the appropriate direction to drain the water.
- **CAUTION:** Always keep hands, fingers, tools and any loose or hanging objects away from rotating parts.
- Remove the battery pack(s) and dry the contacts. If you have an air compressor or a can of compressed air, blow out any water that may be inside the recessed connector housings.
- Dry and lubricate parts after every 30 minutes of operation or if the boat becomes submerged.
- **NOTICE:** Never use a pressure washer to clean your boat.
- Use an air compressor or a can of compressed air to dry the boat and help remove any water that may have gotten into small crevices or corners.
- Spray the bearings, fasteners and other metal parts with a water-displacing light oil or lubricant.
- Let the boat air dry before you store it. Water (and oil) may continue to drip for a few hours.

### Product Inspection
Carefully remove the boat and radio transmitter from the box. Inspect the boat for damage. If you find damage is present, please contact the retailer where you purchased your boat.
Box Contents
- ProBoat® Jet Jam™ 12-Inch RTR Pool Racer
- ProBoat® 2.4GHz Transmitter (PRB18020)
- ProBoat® ESC/Receiver (PRB18017)
- ProBoat® Servo (PRB18018)
- Dynamite® 7.4 1500 mAh 2S 15C Li-Ion Battery (DYNB0110)

Recommended Tools and Materials
- Needle nose pliers
- Paper towel
- Rubbing alcohol
- Phillips screwdriver: #1, #2
- Hex drivers: 1.5mm and 2mm
- Clear tape (DYNM0102)
- ProBoat® Marine Grease and Gun (DYNE4200)

Placing the Decals

Installing the Battery Pack
1. Remove the canopy from the hull by rotating the canopy latch to the left or right and pulling up on the back of the canopy.
2. Install the fully charged battery in the compartment by securing it into the battery cradle with the battery cable toward the front of the boat.
3. Connect the battery to the ESC/Receiver.
Catch Cup

Use the catch cup to push floating objects in the water. To attach the catch cup to the boat, use a #1 Phillips screwdriver.

**NOTICE:** When running the boat without the catch cup, do not reinstall the catch cup screw as it can scratch or rip swimming pool tiles or liners.

Transmitter

**BATTERY LEVEL INDICATOR**
- **Solid Blue:** Battery voltage is good (above 4V).
- **Flash Blue or Beeping Sound:** Battery voltage is critically low (below 4V). Replace batteries.

**ST TRIM**
Adjust to make the boat drive straight with no input at the steering wheel.

**POWER SWITCH**
Power ON or OFF the transmitter.

**STEERING WHEEL**
Controls RIGHT and LEFT steering.

**THROTTLE TRIGGER**
- **Forward**
- **Neutral**
- **Self right**
Controls power to motor for forward or self righting.

Transmitter Battery Installation

This transmitter requires 4 AA batteries.

1. Remove the battery cover from the transmitter.
2. Install the batteries as shown.
3. Install the battery cover.

⚠ **CAUTION:** If using rechargeable batteries, charge only rechargeable batteries. Charging non-rechargeable batteries may cause the batteries to burst, resulting in injury to persons and/or damage to property.

⚠ **CAUTION:** Risk of explosion if battery is replaced with an incorrect type. Dispose of used batteries according to national regulations.
Charging the Battery

**NOTICE:** Charge only batteries that are cool to the touch and are not damaged. Inspect the battery to make sure it is not damaged e.g., swollen, bent, broken or punctured.

**CAUTION:** Only use chargers specifically designed to charge the included Li-Ion-Fe battery. Failure to do so could result in fire, causing injury or property damage.

**CAUTION:** Never exceed the recommended charge rate.

Use only the included USB charger to charge the battery.

1. Connect the charger to a suitable USB power port. The charger will work with most 5V mobile power sources or smartphone chargers with at least 1 amp of power output.

**NOTICE:** Charging the battery with a USB power port with less than 1 amp of power output can produce heat.

2. Connect the charge lead to the battery, noting correct polarity. Charging a fully discharged battery takes approximately 60–90 minutes. Charge times may vary depending on the power source.

3. Remove the battery from the charger when the charging cycle is complete.

4. Remove the charger from the power supply.

**CAUTION:** Once charging is complete, immediately remove the battery. Never leave a battery connected to the charger.

Charger LED Indications

GREEN, flashing = Charging  
RED, solid = Stand by  
GREEN, solid = Charging complete

Charging Warnings

**CAUTION:** All instructions and warnings must be followed exactly. Mishandling of Li-Ion-Fe batteries can result in a fire, personal injury and/or property damage.

- **NEVER LEAVE CHARGING BATTERIES UNATTENDED.**
- **NEVER CHARGE BATTERIES OVERNIGHT.**
- By handling, charging or using the included Li-Ion-Fe battery, you assume all risks associated with lithium batteries.
- If at any time the battery begins to balloon or swell, discontinue use immediately. If charging or discharging, discontinue and disconnect. Continuing to use, charge or discharge a battery that is ballooning or swelling can result in fire.
- Always store the battery at room temperature in a dry area for best results.
- Always transport or temporarily store the battery in a temperature range of 40–120° F (5–49° C).
- Do not store battery or model in a car or direct sunlight. If stored in a hot car, the battery can be damaged or even catch fire.
- Always charge batteries away from flammable materials.
- Always inspect the battery before charging.
- Always disconnect the battery after charging, and let the charger cool between charges.
- Always constantly monitor the temperature of the battery pack while charging.
- **ONLY USE A CHARGER SPECIFICALLY DESIGNED TO CHARGE LI-ION-FE BATTERIES.** Failure to charge the battery with a compatible charger may cause a fire resulting in personal injury and/or property damage.
- Never discharge Li-Ion-Fe cells to below 3V under load.
- Never cover warning labels with hook and loop strips.
- Never charge batteries outside recommended levels.
- Never charge damaged batteries.
- Never attempt to dismantle or alter the charger.
- Never allow minors to charge battery packs.
- Never charge batteries in extremely hot or cold places (recommended between 40–120° F or 5–49° C) or place in direct sunlight.

**Low Voltage Cutoff (LVC)**

Discharging a Li-Ion-Fe battery below 3V per cell may damage the battery. The included ESC protects the boat battery from over-discharge using Low Voltage Cutoff (LVC). Before the battery charge decreases too much, LVC removes power supplied to the motor.

Power to the motor will be reduced significantly, showing that the battery has reached the minimum LVC threshold. The ESC is programmed to allow enough battery power to return to shore, at no more than ¼ throttle.

Disconnect and remove the Li-Ion-Fe battery from the boat after use to prevent trickle discharge. Charge your Li-Ion-Fe battery to about half capacity before storage. During storage, make sure the battery charge does not fall below 3V per cell. LVC does not prevent the battery from over-discharge during storage.

**NOTICE:** Repeated operation to LVC will damage the battery.

**Tip:** Monitor your boat battery’s voltage before and after boating by using a Li-Ion-Fe Cell Voltage Checker (EFLA111, sold separately).
Getting Started

1. Connect the battery to the ESC.
2. Power on the ESC switch.
3. Power on the transmitter.

Control Check

IMPORTANT: Perform a control check at the beginning of each boating session, after repair or after installation of a new battery.

Ensure that the battery is fully charged.
1. With the transmitter and boat powered ON, place the boat on the boat stand.
2. Turn the transmitter STEERING WHEEL to the LEFT and to the RIGHT to verify the jet nozzle is in sync with the steering input.
3. Pull the THROTTLE TRIGGER. The coupler should rotate to the left. Air will flow from the jet nozzle.

Testing Your Boat in the Water

Tip: Before placing your boat in the water, secure the canopy on the hull. Apply clear tape (DYNM0102) around the canopy seam, if desired.

1. Carefully place the boat in the water.
2. If the boat does not go straight, adjust the steering trim dial on the transmitter.
   
   Tip: If you are using excessive steering trim on your transmitter to make the boat drive straight, return the trim to neutral and mechanically center the rudder. To do this, use a 1.5mm hex driver to loosen the set screw holding the push rod to the servo. Adjust the linkage in or out of the brass barrel until the rudder is centered. Tighten the set screw using a 1.5mm hex driver.
3. Retrieve the boat when it begins to lose speed.
4. Power off the ESC and disconnect the battery.

NOTICE: Always power OFF the receiver before powering OFF the transmitter. If the transmitter is powered OFF before the boat, the receiver will enter failsafe mode.
**Boating Tips**

This boat is intended for use in pools or small ponds but can be used in any body of water.

- Follow **Self-Righting** instructions if your boat flips.
- Apply a small burst of throttle if your boat has air in the jet pump. The boat will start moving under its own power once the pump is full of water.
- Do not run your boat in water full of people.

**WARNING:** The boat can cause bodily harm if it comes in contact with a person’s body or hair.

- Do not run your boat directly in to the side of a tile-lined pool.
- Do not run your boat in a pond with floating debris or tall grass.

Unlike ruddered steerable boats, jet boats must have power applied to the motors in order for the boat to turn. When making turns, decrease the throttle to reduce the probability of flipping the boat over. The boat will not steer when coasting off power.

**Self-Righting**

If the boat turns over, release the throttle until the boat comes to a stop. Return the boat to upright by applying a short throttle burst.

The boat sitting in the water normally leans to the battery side. Apply throttle to level the boat. No weight adjustment is necessary.

To self-right the boat in calm water:
1. Apply a burst of reverse.
2. Apply a burst of full throttle. The boat should rock and right itself.

To self-right the boat in rough water:
1. Release the throttle.
2. Apply a burst of forward, reverse and forward throttle. The boat should rock and right itself.

**Tip:** The boat may not self right in extremely rough water.

**CAUTION:** Repeated failed attempts to self-right may cause the electronics to overheat.

Never operate your boat in less than 3 inches (7.6 cm) of water.

**CAUTION:** Running your boat in shallow water increases the chance of debris entering the jet pump. Verify that the jet pumps are free of debris, as operating the boat with a blocked jet drive for a prolonged period will damage the motor and ESC.

**CAUTION:** Never operate your boat in extreme temperatures or turbulent water.

**WARNING:** Never attempt to retrieve a downed boat by swimming unless you are sufficiently trained and/or there is another person available to respond in the case of an emergency.

**When You Are Finished**

1. Power off the boat.
2. Power off the transmitter.
3. Disconnect and remove the battery from the boat.

**Tip:** Always remove the canopy before storage or moisture may allow mold and mildew to grow in the boat.
After Boating and Maintenance

- Fully dry the inside and outside of the boat.
- Remove the hatch before storing your boat.
- Repair any damage or wear to the boat.
- Lubricate the driveshaft using ProBoat Marine Grease (DYNE4200).
- Make note of lessons learned from the trimming of your boat, including water and wind conditions.

**NOTICE:** When you are finished boating, never leave the boat in direct sunlight or in a hot, enclosed area such as a car. Doing so can damage the boat.

Binding

The included transmitter and receiver are bound at the factory. If you need to rebind, follow the instructions below.

1. Power ON the boat. The receiver LED will blink.
2. Power ON the transmitter. The receiver LED will go solid, indicating it is bound.

If you encounter problems, follow binding instructions and refer to the troubleshooting guide for other instructions. If needed, contact the appropriate Horizon Product Support office.

**NOTICE:** Do not attempt to bind the transmitter and receiver if there are other compatible transmitters in bind mode within 400 feet. Doing so may result in unexpected binding.

Failsafe

In the unlikely event that the radio connection is lost during use, the receiver will drive the servos to their pre-programmed failsafe positions as set during BINDING.

If the receiver is powered on before powering on the transmitter, the receiver will enter this failsafe mode. When the transmitter is powered on, normal control is resumed.

**IMPORTANT:** Failsafe activates only in the event that signal is lost from the transmitter. Failsafe will NOT activate in the event that receiver battery power decreases below the recommended minimums or power to the receiver is lost.

Motor Care

- Prolong motor life by preventing overheating conditions.
- Regularly lubricate (DYNE0100) the bushings on each end of the motor and more frequently when the motor is wet. Failure to do so may cause the motor shaft to seize in the bushings.

- Use water displacement fluid to flush any water from the motor compartment.
**Drivetrain Lubrication**

Always replace the drivetrain parts when they are damaged or show visible wear or injury and damage may result.

Lubricating the driveshaft is vital to the life of the drivetrain. The lubricant also acts as a water seal, keeping water from entering the hull through the stuffing tube.

1. Use a #1 Phillips screwdriver to remove the 4 screws from the jet pump nozzle.
2. Hold the jet pump nozzle at the base and gently pull it away from the hull to unhook it from the steering link.
   **Tip:** When removing the jet pump nozzle, move the servo arm so that it provides slack to the steering link and allows you to pull the nozzle away from the boat. You do not need to remove the steering links from the jet pump nozzle to service the propeller shaft.
3. Use a 2mm driver to remove the grub screw from the shaft side of the motor coupler. You do not need to remove the grub screw from the motor end of the coupler unless you are removing the motor or replacing the coupler.
4. Free the propeller drive shaft from the motor coupling and gently grip the shaft to pull it away from the motor coupler.
5. Lubricate the half of the propeller shaft that inserts into the motor coupling with marine grease (DYNE4200 or DYNE4201).
   **Tip:** There is no need to lubricate more than half of the length of the propeller shaft because only half of the propeller shaft is contained in the jet pump housing.
   **IMPORTANT:** Excessively greasing the shaft can cause grease accumulation in the jet pump housing, which can cause water-flow restriction through the jet pump. It will not damage the drive system, but it may decrease water flow through the jet pump, or attract debris that will to stick to the grease.
6. Reinsert the propeller shaft into the pump housing using the hole on the motor coupler. Use the grub screws thread as a guide to find the flat spot on the drive shaft to determine how far to insert the shaft into the coupler.
   **IMPORTANT:** Ensure that the flat spot on the shaft is oriented correctly. Do not screw in the motor coupler grub screw until Step 9.
7. Lubricate the jet pump nozzle bushing with a small dab of marine grease. This metal bushing supports the rear end of the driveshaft.
8. Use a #1 Phillips screwdriver to carefully reinstall the jet pump nozzle.
9. Use a 2mm hex driver to install and tighten the motor coupler grub screws.
10. Power the boat and apply a small amount of throttle to ensure the shaft is inserted properly.
   **Do not touch the pump housing.**

**NOTICE:** Running the boat in saltwater could cause some parts to corrode. If you run the boat in saltwater, rinse it thoroughly in freshwater after each use and lubricate the drive system. You can also use water displacement spray to help prevent the parts from corroding.

**NOTICE:** Because of its corrosive effects, running RC boats in saltwater is at the discretion of the modeler.
# Troubleshooting Guide

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Boat will not respond to throttle but responds to other controls</td>
<td>Wet motor causes bushings to seize</td>
<td>Remove motor and apply penetrating oil to both ends of the motor. Rotate the motor shaft by hand to break the corrosive bond between the motor shaft and the bushings</td>
</tr>
<tr>
<td></td>
<td>Debris blocking a jet pump</td>
<td>Remove the jet pump nozzle, remove debris and verify that nothing prevents the propeller from turning</td>

Limited Warranty

What this Warranty Covers
Horizon Hobby, LLC, (Horizon) warrants to the original purchaser that the product purchased (the “Product”) will be free from defects in materials and workmanship at the date of purchase.

What is Not Covered
This warranty is not transferable and does not cover (i) cosmetic damage, (ii) damage due to acts of God, accident, misuse, abuse, negligence, commercial use, or due to improper use, installation, operation or maintenance, (iii) modification of or to any part of the Product, (iv) attempted service by anyone other than a Horizon Hobby authorized service center, (v) Product not purchased from an authorized Horizon dealer, or (vi) Product not compliant with applicable technical regulations or (vii) use that violates any applicable laws, rules, or regulations.

OTHER THAN THE EXPRESS WARRANTY ABOVE, HORIZON MAKES NO OTHER WARRANTY OR REPRESENTATION, AND HEREBY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE PURCHASER ACKNOWLEDGES THAT THEY ALONE HAVE DETERMINED THAT THE PRODUCT WILL SUITABLY MEET THE REQUIREMENTS OF THE PURCHASER’S INTENDED USE.

Purchaser’s Remedy
Horizon’s sole obligation and purchaser’s sole and exclusive remedy shall be that Horizon will, at its option, either (i) service, or (ii) replace, any Product determined by Horizon to be defective. Horizon reserves the right to inspect any and all Product(s) involved in a warranty claim. Service or replacement decisions are at the sole discretion of Horizon. Proof of purchase is required for all warranty claims. SERVICE OR REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS THE PURCHASER’S SOLE AND EXCLUSIVE REMEDY.

Limitation of Liability
HORIZON SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY, REGARDLESS OF WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY OR ANY OTHER THEORY OF LIABILITY, EVEN IF HORIZON HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Further, in no event shall the liability of Horizon exceed the individual price of the Product on which liability is asserted. As Horizon has no control over use, setup, final assembly, modification or misuse, no liability shall be assumed nor accepted for any resulting damage or injury. By the act of use, setup or assembly, the user accepts all resulting liability. If you as the purchaser or user are not prepared to accept the liability associated with the use of the Product, purchaser is advised to return the Product immediately in new and unused condition to the place of purchase.

Law
These terms are governed by Illinois law (without regard to conflict of law principals). This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Horizon reserves the right to change or modify this warranty at any time without notice.

WARRANTY SERVICES
Questions, Assistance, and Services
Your local hobby store and/or place of purchase cannot provide warranty support or service. Once assembly, setup or use of the Product has been started, you must contact your local distributor or Horizon directly. This will enable Horizon to better answer your questions and service you in the event that you may need any assistance. For questions or assistance, please visit our website at www.horizonhobby.com, submit a Product Support Inquiry, or call the toll free telephone number referenced in the Warranty and Service Contact Information section to speak with a Product Support representative.

Inspection or Services
If this Product needs to be inspected or serviced and is compliant in the country you live and use the Product in, please use the Horizon Online Service Request submission process found on our website or call Horizon to obtain a Return Merchandise Authorization (RMA) number. Pack the Product securely using a shipping carton. Please note that original boxes may be included, but are not designed to withstand the rigors of shipping without additional protection. Ship via a carrier that provides tracking and insurance for lost or damaged parcels, as Horizon is not responsible for merchandise until it arrives and is accepted at our facility. An Online Service Request is available at http://www.horizonhobby.com/content/service-center_render-service-center. If you do not have internet access, please contact Horizon Product Support to obtain a RMA number along with instructions for submitting your product for service. When calling Horizon, you will be asked to provide your complete name, street address, email address and phone number where you can be reached during business hours. When sending product into Horizon, please include your RMA number, a list of the included items, and a brief summary of the problem. A copy of your original sales receipt must be included for warranty consideration. Be sure your name, address, and RMA number are clearly written on the outside of the shipping carton.

ATTENTION: Do not ship Li-Po batteries to Horizon. If you have any issue with a Li-Po battery, please contact the appropriate Horizon Product Support office.

Warranty Requirements
For Warranty consideration, you must include your original sales receipt verifying the proof-of-purchase date. Provided warranty conditions have been met, your Product will be serviced or replaced free of charge. Service or replacement decisions are at the sole discretion of Horizon.

Non-Warranty Service
Should your service not be covered by warranty, service will be completed and payment will be required without notification or estimate of the expense unless the expense exceeds 50% of the retail purchase cost. By submitting the item for service you are agreeing to payment of the service without notification. Service estimates are available upon request. You must include this request with your item submitted for service. Non-warranty service estimates will be billed a minimum of ½ hour of labor. In addition you will be billed for return freight. Horizon accepts money orders and cashier’s checks, as well as Visa, MasterCard, American Express, and Discover cards. By submitting any item to Horizon for service, you are agreeing to Horizon’s Terms and Conditions found on our website http://www.horizonhobby.com/content/service-center_render-service-center.

## FCC Information

### FCC ID: XNZ91900G

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This product contains a radio transmitter with wireless technology which has been tested and found to be compliant with the applicable regulations governing a radio transmitter in the 2.400GHz to 2.4835GHz frequency range. This equipment has been tested and found to comply with the limits for Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

### IC Information

**IC: 20264-91900G**

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

### Antenna Separation Distance

When operating your Spektrum transmitter, please be sure to maintain a separation distance of at least 20 cm between your body (excluding fingers, hands, wrists, ankles and feet) and the antenna to meet RF exposure safety requirements as determined by FCC regulations.

The following illustrations show the approximate 20 cm RF exposure area and typical hand placement when operating your Spektrum transmitter.

---

## EU Compliance Statement

Horizon Hobby, LLC hereby declares that this product is in compliance with the essential requirements and other relevant provisions of the RED and EMC Directives.

A copy of the EU Declaration of Conformity is available online at: [http://www.horizonhobby.com/content/support-render-compliance](http://www.horizonhobby.com/content/support-render-compliance).

## Instructions for Disposal of WEEE by Users in the European Union

This product must not be disposed of with other waste. Instead, it is the user’s responsibility to dispose of their waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or where you purchased the product.
