

Tariff 301 Information Official Press Release

On July 7, 2018 the Office of United States Trade Representatives began imposing additional tariff charges, ranging from 10-25%, on a comprehensive list of products being imported from China. Certain Horizon Hobby products have been affected by this since that date, and we have been absorbing the impact of these increased tariffs in an effort to mitigate impact our valued customers.

On October 1, 2018 select Horizon Hobby products including transmitters, servos, motors, receivers, and other items will have their prices adjusted. With our continued commitment to our customers, we will be taking minimal pricing action on affected items and will absorb tariff costs when possible. Price changes will vary by product to ensure only the necessary price adjustment with respect to the varying tariff impact on each item. We are notifying you prior to these changes and providing a storefront of products that will increase in price due to the tariff.

Horizon is committed to providing consistent products, service, and support. To achieve this, it is necessary that we comply with regulatory action such as this and adjust only as necessary to ensure minimal disruption and impact to our customers. We appreciate your understanding and continued support as we navigate these unanticipated and ever-evolving trade negotiations.
